

**BULLETIN nr 1/2010 for
ESTONIAN CHAMPIONSHIP/ BaTCC 2010 SUPER 1600 TECHNICAL REGULATIONS**

2.3 Windows. The windshield must be of original shape and consist of triplex glass. The rest of the windows may be replaced by transparent polycarbonate (minimum thickness 3 mm) or other transparent material (minimum thickness 2 mm) that does not break when folded. The driver must have certificate for this material. ~~The cars, which have technical passport since 01.01.2009, must use only all original windows.~~ **Is compulsory use clear protection film on the original windows of drivers and co-drivers door.** Tinting of the car windows in any way is prohibited, with the exception of the upper edge of the windshield (width: 150 mm), where advertising stickers or the like may be located.

Comment: The cars with technical passport at 2009 or 2010 can also use the polycarbonate or other transparent material.

Confirmed: EASU Racing Committee, December 2009.
